BIO-LINK

MONETIZATION

WITH ADSFLUENCE

MENU

Pre-Roll Video ..... Embedded video player

Interstitials ..... link monetization

Content Lockers ..... gated content

Display Ads ..... On page ads

App Wall ..... below the fold

Offer Wall ..... below the fold

Cross Platform ..... QR code page

Surveys ..... Paid opinion polls

AdsFluence supports a plethora of ad units and types to allow you and your influencers to place the right ads in the right places, enhance the viewing experience, and provide value like no other bio link tool available

PRE-ROLL VIDEO

youtube, tiktok, instagram reels and stories all make great video content, but unfortunately, the monetization options on those platforms are pretty limited, as is the distribution.

AdsFluence solves this problem by creating embedded videos from your content, directly in your bio link.

Embedded videos are monetized with video ads

Many bio link tools will allow influencers to add custom links to their bio page. This is a great way to grow and diversify audiences across platforms.

BUT....

only **AdsFluence** allows influencers to monetize these links with content lockers and interstitials.

How it works:

clicking the link redirects to an interstitial page with an ad or video. Viewers can skip or close interstitials but must perform an action to close content lockers

we love scrollers, and with **AdsFluence**, there are always more opportunities to convert scrollers into earnings.

Our below-the-fold content includes app installs and offers that accept rewarded traffic.

Looking for a stand-alone app wall? we can provide that too

CROSS PLATFORM

There is nothing more frustrating than losing a click because you misidentified a device.

AdsFluence has you covered

When we detect a mismatch a QR code page is served. The scannable code will launch the linked URL when scanned from a mobile device matching the target platform.

What's more... we'll even monetize the QR code page as well. so even if they don't scan, you'll still be serving impressions.

Engaging with your audience can be challenging. It's difficult to find or create great content to consistantly spark a conversation

AdsFluence has solved for this challenge too, by providing Opinion Surveys.

Now influencers can solicit direct feedback on hot button topics that matter, by asking them to complete surveys, and influencers earn commissions in the process.
